NEWS

Available now: Asset management grants for municipalities

The call for applications is now open for our asset management grants for municipalities. Apply for a grant o up to \$50,000 for an initiative that will help your community make informed decisions about operating, maintaining and replacing its infrastructure such as roads, buildings, water supply and sanitation systems. Learn more about eligible project types and how you can apply today.

▶ LEARN MORE

Update on the Keystone XL project

The world watched last week as a new administration was sworn in in Washington, DC. The new US government immediately issued a number of Executive Orders, including one to rescind the permit for the Keystone XL pipeline expansion project. The Canadian federal government responded to this news stating that they will continue to make the case for the project to the US administration.

While FCM does not take a position on individual energy infrastructure projects, FCM's current policy calls o the Canadian government to support the development of nation-building energy infrastructure projects. FCM has reached out quickly to a number of key federal Ministers's offices to clearly reiterate FCM's Board policy on energy infrastructure. We heard a renewed commitment from our federal counterparts to continu to work with FCM and WEST to advance necessary energy infrastructure projects, like pipelines, within a framework of achieving net-zero emissions by 2050.

Here you'll find our Board-adopted resolutions from 2019 and 2020, calling on the government to support energy-producing regions, stipulating that energy infrastructure must meet high environmental standards and respect appropriate jurisdiction, and calling on the federal government to establish national utility corridors as a national priority with a predictable impact assessment processes.

EVENTS

Webinar: Developing district energy

Is your community interested in adopting a district energy system? Also known as low-carbon thermal energy, district energy distributes heating and cooling via a series of underground pipes, increasing energy efficiency and reducing municipal greenhouse gas emissions. On Tuesday, February 2 at 1:00 p.m. ET, ICLEI Canada and our Partners for Climate Protection program is hosting a free webinar featuring expert speakers detailing the advantages of district energy and offering advice on how to implement it in your community. Sign up today to learn more about how district energy can benefit your community.

How to build a strong business case for a green municipal project

Before you can start a new project, you first need buy-in from your municipal council or other city staff. Attend our webinar at 1 p.m. ET on Tuesday, February 2 and learn the five keys of a successful business case for sustainable projects. Speakers who've launched successful initiatives will share insights on integrating a triple bottom line, engaging with stakeholders and more.

RESOURCES

Simplify your planning with the Municipal Energy Roadmap

The Municipal Energy Roadmap helps identify the best solutions for Canadian communities to lower GHG emissions in their buildings and meet long-term sustainability objectives. In this short primer, you'll learn how the Energy Roadmap can be used to:

- Prioritize solutions based on your region, grid type and other factors.
- Explore workable options with GHG emission and financial impact estimates.
- Clarify the advantages and challenges of each solution.
- ► READ THE ENERGY ROADMAP PRIMER

It's International Development Week in Canada!

View email in your br

FCM NEWS | February 8, 2021

Happy International Development Week!

Welcome to the 31st edition of Canada's International Development Week – a tribute to our country's global impact.

FCM has been working internationally since 1987. In those 34 years, our members have collaborated with municipal partners in Africa, Central and South America, the Middle East, Asia and Eastern Europe. Last year alone, we managed projects in 11 countries. These programs, funded by Global Affairs Canada, foster inclusive governance and support local economic development. In many communities, they also increase environmental sustainability, which helps Canada contribute to the United Nation's Sustainable Development Goals.

Our peer-to-peer approach provides unique opportunities for Canadian municipal staff and elected officials to share their expertise with international counterparts. When FCM members travel to project locations, they gain a better understanding of the challenges their new colleagues are facing. They go to listen, to observe and to offer potential solutions. They often come back with new perspectives on their own work and innovative ideas they can adapt to their municipal context.

For almost a year now, the global pandemic has moved such in-person interactions to online platforms. We are so proud of how project partners and Canadian representatives have harnessed technology to continue working together despite the difficult circumstances. Their resourcefulness and dedication have kept collaboration thriving, which will open new avenues and yield shared successes this year and beyond.

We salute all who contributed time, knowledge and enthusiasm to FCM's international programs in 2020. We look forward to a new year where we will continue to learn from each other and, in solidarity, make the world a better place, one project at a time.

Congratulations to our three International Awards Winners!

A message from FCM President Garth Frizzell:

Following a challenging year for municipalities everywhere, I am proud to report that FCM's international programs made tangible impacts in the many communities where we work. The credit for this significant achievement is due in large part to the individuals and institutions who were undeterred in their efforts to create new connections, strengthen existing partnerships and find joint solutions.

To mark Canada's International Development Week, it is my pleasure to announce the recipients of FCM's 2020 International Awards. As honoured as I was to be among remarkable <u>finalists</u> who showed true dedication to the spirit of collaboration that is at the heart of FCM's international programming, one was selected in each category.

Congratulations to...

Vicky-May Hamm, Mayor of Magog (Québec): Winner of the Pam McConnell Award for the advancement and promotion of gender equality in FCM's programs.

Vicky-May supported FCM's Inclusive Municipal Leadership Project (PLMI), which works with eight Tunisian municipalities to provide training to women elected officials. In Tunisia's 2018 municipal elections, women were elected to almost half of councilors' seats and won 20 percent of mayoral races. By outlining the importance of involving women in decision-making, and sharing insights from her extensive experience leading her growing city, Vicky-May quickly became both a role-model and a valuable resource for Tunisian women starting out in politics.

Sean Lee, Assistant Director, Engineering & Operations at the City of Fredericton (New Brunswick): Winner of the Mike Badham Award for individual innovation, creativity, engagement and leadership.

Sean worked with two South African municipalities to modernize their infrastructure as part of FCM's Building Inclusive Green Municipalities (BIGM) program. He is well known for his ability to adapt technical assistance and project planning to different political realities. His leadership inspired peers to tackle the challenges of asset management together. Sean also hosted four study visits from South African delegations that included meetings with Fredericton's mayor, City Council and departmental staff.

City of Yorkton (Saskatchewan): Winner of the Outstanding Institutional Contribution Award for commitment, leadership and lasting impact in a partner community.

The City of Yorkton has been a steadfast ally of the Jordan Municipal Support Project (JMSP). It has deployed five technical staff and one elected official, councillor Randy Goulden, an FCM board member, on nine missions, contributing a total of 270 days of staff time. Jordanian municipalities have benefited immensely from their technical assistance, namely in the areas of strategic planning and solid waste management. Yorkton staff also hosted six Jordanian partners during a very productive study tour for overseas peers. This is a shining example of the FCM model at its best!

Read about the winners and finalists.

Malawi: making a lasting impact

In 1988, the District of Saanich, BC partnered with Zomba, Malawi on FCM's Africa 2000 project, which was funded by CIDA, Canada's then international development agency. Missions by members and FCM staff in Zomba and Saanich focused on the operation of wells, administration and computer training, as well as the provision of medical supplies to the community.

Although FCM's project ended, the connection continued. In 2007, Saanich staff raised \$35,000 to build the Muula Community-Based Childcare Centre. They also launched Zomba Kidz, the Saanich Centennial Project, with an annual budget of \$10,500. Zomba Kids is funded entirely through staff donations, and for 14 years it has covered teacher salaries, maintenance of the building, a maize-growing program, and a daily feeding program for 130 children aged of 3-6. It is administered through local partners who remain in close contact with a volunteer committee in Saanich.

This year, in addition to dealing with the COVID-19 pandemic, Zomba's Childcare Centre will need support with maintenance. It is also planning to include up to 250 children in the feeding program. Saanich volunteers continue to offer assistance, but they will need help.

To find out more, contact international@fcm.ca

International Spotlight: FCM takes part in climate financing consultation

Municipalities around the world are directly responsible for close to 50 per cent of global greenhouse gas (GHG) emissions. They are in charge of urban planning, infrastructure, transportation, waste and water management, all of which are important greenhouse gas emitting sectors.

These local and regional responsibilities made it important for FCM to contribute to the Government of Canada's consultation on international climate financing in the summer of 2020. A total of 530 people from more than 20 countries, and over 300 organizations, were engaged in this exercise.

In December 2020, the Government released its What we heard report. FCM's submission focused on the importance of climate financing for local initiatives and technical capacity building in developing countries.

Read the report.

Help us spread the word: invite your network to subscribe to Exchange.

FCM NEWS | February 8, 2020

FCM's Big City Mayors' Caucus to meet ahead of Budget 2021

With a crucial federal budget approaching, FCM's Big City Mayors' Caucus (BCMC) meets virtually this week to discuss our municipal vision for Canada's economic recovery, and the critical support needed to ensure cities and communities can help keep Canadians safe.

Cities and communities of all sizes are central partners in Canada's pandemic response and recovery. So we're proposing multi-impact investments that respond to people's urgent COVID challenges while also laying groundwork for a recovery rooted in the places where Canadians live and work every day. We're also making it clear that extending operating support for municipalities for the duration of the pandemic is a top priority—so local leaders can focus on creating jobs and driving this country's recovery.

Universal Broadband Fund: deadline extended

The application deadline for the Universal Broadband Fund (UBF) has just been extended to March 15, 2021 That's a welcome response to FCM's advocacy on behalf of smaller communities who may have needed a bir more time to put together an application. The \$1.75 billion UBF is an important tool for rural, remote and northern communities looking to expand local high-speed Internet access. If you have questions about completing your application, you can connect with the federal "pathfinder" service by phone (1-800-328-6189) or email.

New federal investments in rural transportation

View email in your browser

FCM February 10, 2021

COMMUNIQUÉ

New federal investments in rural transportation

Dear rural members,

This morning the Prime Minister announced <u>new federal funding for rural and remote</u> <u>transportation</u> to help drive the strong, nationwide recovery Canadians need—a clear sign that FCM's work on behalf of rural communities is having an impact.

Today's announcement is part of a landmark new permanent public transit fund, and a direct result of years-long FCM advocacy. As you know, our advocacy—developed with feedback from rural members—has consistently called for dedicated funding for rural and regional transportation needs as an integral part of any nation-building transit plan.

FCM strongly welcomes this investment in rural communities. Getting people moving is a priority for communities of all sizes. That's why FCM and our Rural Forum have urged our federal partners to apply a rural lens to federal transit investments. The importance of rural communities has also been echoed by our big city members, including at this morning's announcement by Edmonton Mayor Don Iveson.

The next stage in this process—program design and confirmation of the size of this funding stream—will be critical. We will engage our federal counterparts to get this right.

Today, we're acknowledging this announcement as a positive step to kick-start economic recovery for rural communities across Canada.

Thank you all for your hard work in making today's investment possible.

Sincerely,

Garth Frizzell

FCM President

safety concern

During the Covid pandemic there is increased pedestrian traffic on streets within the village of Wawanesa and in particular on the shoulders of PR 340.

I personally have given up walking on the shoulder of PR 340 due to speeding traffic that seemingly ignore the identified speed zone. The traffic has increased significantly of late with gravel truck traffic, many of which are obviously speeding on Pr340 within the village of Wawanesa. I have personally witnessed speed reading between 80 and 90 kms on the speed reading sign in the 50km zone on PR 340 within the village of Wawnesa.

regards
Dan Gullett
23 Government Rd.
Wawanesa Mb.

I sent email to
PW/CAO;
I thanked Mr. Guellett
for his concern and
said it would go as
correspondence to next
yntg.
Dustin Johnston said
Colletts have been
hauling steadily on PR
340. Darcy was asked
to call Calletts and
Gring concern to their
attention.

OFFICE OF THE MAYOR

VIA E-MAIL: cao@oakland-wawanesa.ca

Office of the Mayor, Municipality of Oakland-Wawanesa 54 Main Street, Box 28 Nesbitt, MB ROK 1P0

Attention: Mayor Dave Kreklewich

RE: Reinstatement of the 1976 Coal Development Policy

Dear Mayor:

In June of 2020, the Government of Alberta rescinded the Coal Development Policy (Coal Policy) without adequate consultation with First Nations, environmental groups, residents, property owners and local governments. This policy was originally developed with the intended purpose to guide coal extraction along the eastern slopes of the Rockies based upon a land use classification system and dictated where and how coal leasing, exploration and development could occur.

The Coal Policy introduced in 1976, guided coal extraction in one of the most important landscapes in Alberta and Canada. The Eastern Slopes provides water to users from the Rockies to the Hudson Bay. For 44 years, the policy provided essential protection of valuable water resources, ensuring downstream communities had access to clean drinking water, that farmers had access to irrigation water to protect their livelihoods and that ecosystems that tourists come to experience remained in their pristine state.

The rescindment of any policy that affects public lands and/or water resources, requires public consultation with First Nations, environmental groups, residents of Alberta, property owners and local municipalities. Without that consultation, our democratic processes are undermined.

In response to the Government of Alberta's action, the Town of High River's Council adopted the following resolution at its Regular Meeting of Council on January 11, 2021:

BE IT RESOLVED THAT Council direct Administration to draft a letter to Premier Jason Kenney, requesting the immediate reinstatement of the 1976 Alberta Coal Policy which was rescinded on June 1, 2020;

AND THAT the letter requests that the Government of Alberta begin public consultation with Indigenous groups, environmental groups and all stakeholders in Alberta on any proposed revisions or replacement to this policy;

AND FURTHER THAT this letter be sent to the Minister of Environment & Parks Honorable Jason Nixon, Minister of Energy Honourable Sonya Savage as well as the MLA for Livingstone-Macleod Roger Reid.

This letter was sent to the Premier and Ministers on January 12, 2021 and a meeting has been requested with the Premier. To date, the Town of High River has neither received a response to our letter nor a meeting with the Premier.

Other local governments, public officials and Albertans have called upon the Government of Alberta to reinstate the Coal Policy. In response, the Government of Alberta has cancelled some of the coal leases but this is not adequate in order to protect water resources for downstream communities, such as High River.

Therefore, at the February 1, 2021 Special Meeting of Council, the following resolution was adopted:

WHEREAS Council adopted resolution #RC 14 -2021 requesting the Province of Alberta immediately re-instate the 1976 Coal Development Policy;

AND WHEREAS coal exploration and open pit mining will impact water resources for downstream communities affecting businesses, residents, ranchers, farmers and ecosystems;

AND WHEREAS coal exploration is causing irreparable damage to the landscapes and watersheds as well as adversely affecting the public's access, use and enjoyment of Crown lands on the Eastern Slopes of Alberta;

AND WHEREAS local First Nations groups, municipalities, landowners and ranchers are legally challenging the Province's rescindment of the 1976 Coal Policy in the Courts;

BE IT RESOLVED THAT Council request all coal exploration be immediately ceased on the Eastern Slopes of Alberta and cease issuance of any new exploration permits on the Eastern Slopes of Alberta until public consultation has taken place regarding the future of coal mining on the Eastern Slopes of Alberta;

AND THAT Council request the Government of Alberta & Premier Jason Kenney issue an immediate stop work order for all existing coal exploration permits on the Eastern Slopes of Alberta and cease issuance of any new exploration permits on the Eastern Slopes of Alberta until public consultation has taken place regarding the future of coal mining on the Eastern Slopes of Alberta;

AND THAT Council direct Administration to investigate legal options relating to the damage caused due to exploration on Alberta's Eastern Slopes.

AND FURTHER THAT Council direct Administration to prepare a letter with a copy of this resolution to all members of the Federation of Canadian Municipalities, Alberta Urban Municipalities Association, Rural Municipalities of Alberta, Municipalities of Saskatchewan, Saskatchewan Association of Rural Municipalities and Association of Manitoba Municipalities requesting their support to re-instate the 1976 Coal Development Policy.

In light of this resolution, the Town of High River is respectfully requesting that you consider drafting a letter of support to the Government of Alberta for the immediate Exploration Stop Work Order as well as the reinstatement of the Coal Policy.

Thank you for considering our request,

Sincerely,

Craig Snodgrass Mayor

NEWSLETTER

February 2021

2021 ANNUAL AWARDS BANQUET

Unfortunately, the 2021 Annual Awards Banquet had to be cancelled. If restrictions lift my hope is to have a small banquet but it is not looking good. If there is no banquet, the awards will be delivered to the municipalities in the summer when the judging takes place. The individual winners can pick up their plaques from the RM. This is what was done last year.

The winners of the 2019 competition will be receiving a letter to return their award <u>DIRECTLY</u> to <u>Keystone Sports Excellence, 170</u>

<u>Saskatchewan Ave West, Portage la Prairie, MB, R1N 0M1. Please do not send the awards until you receive the letter from the office as sending too early may lead to the misplacement of the award.</u>

In May, nomination forms will be emailed for the 2021 judging competition. It was noted that council may not have the time to look for entries but the grader operators could bring a suggestion to council as they are the ones on the roads every day. This would increase the number of entries in each category which would ensure the competition is a success!

COURSES

The two day Gravel Road Design and Maintenance course will hopefully be offered this year once restrictions lift. Please watch your email for course registrations! If you are interested in hosting this course please contact the MGRA office.

If there are any courses that you would like offered in the future please feel free to call or email the office. If you are interested in hosting a course in your area please let me know!

If there is enough interest for a certain course and it can be offered virtually, I could look into that!

MGRA Red River Municipal Engineering Technology Scholarship

The winner of the MGRA Scholarship was Kelly Czechmeister.

The MGRA scholarship is given to a student that resides in Rural Manitoba and has an interest in Roadway Design. This scholarship is a tribute in memory of Robert Kwok, long term Municipal Technology instructor that passed away in October 2008. Robert instructed many courses for MGRA and we thought we would give back to the community in his honor.

MEMBERSHIP

Membership renewal notices have been emailed to the offices. Our membership is growing constantly each year especially due to the substantial cost benefit when registering for courses!

My personal goal is to acquire ALL municipalities as members to MGRA so I appreciate your continued support in achieving this goal!

If you know of any municipalities that are not members, please talk to them about your experience with being members so they may consider membership!

Greg's Story is a short film about Greg Price's journey through the healthcare system. The film gives a glimpse of who Greg was, an ambitious young engineer and focuses on the events of his healthcare journey that ended in his unexpected and tragic death. In spite of the sadness of Greg's Story, the message of the film is intended to inspire positive change and improvement in the healthcare system.

APPLICATIONS NOW AVAILABLE FOR 2021 URBAN AND HOMETOWN GREEN TEAM GRANTS

Urban and Hometown Green Team grant applications are now available for organizations to hire youth between the ages of 15 and 29 for summer jobs in Manitoba, Municipal Relations Minister Derek Johnson announced today.

"Green Team programs support summer employment for hundreds of young Manitobans and we look forward to the work they can accomplish in 2021," said Johnson. "In addition to supporting community projects, employment through the Green Team also provides valuable work experience for youth, which is very beneficial for future career opportunities."

Green Team grants allow communities to hire youth aged 15 to 29 to work on community projects between May 1 and Aug. 31. Eligible recipients include non-profit organizations in Winnipeg and rural Manitoba and municipal governments in rural Manitoba.

Priorities for the 2021 summer season are focused on community-based organizations and municipal governments that can offer full-time employment opportunities for youth and on projects that support COVID-19 response and recovery efforts.

The grants cover 100 per cent of wage costs and \$250 per position for support costs in non-profit organizations. Municipal governments receive 50 per cent of wage costs and \$125 per position for support costs, on a cost-shared basis.

The deadline for applications is Feb. 15. For more information on Green Team applications, visit www.manitobago.ca.

PROVINCE ANNOUNCES NEXT INTAKE FOR BUILDING SUSTAINABLE COMMUNITIES GRANTS

Program Continues to Protect and Enhance Community Services: Johnson

The Building Sustainable Communities Program grant application intake will open on Monday, Jan. 18, to support community development projects, Municipal Relations Minister Derek Johnson announced today.

"Our streamlined grant program is flexible and more responsive to community needs, reduces red tape and enhances the project outcomes," said Johnson. "We are committed to supporting projects from municipalities, non-profit and community-led organizations across the province."

The 2021 program intake has been expanded to include support for larger-scale capital projects. This includes a maximum grant contribution of 50 per cent of eligible capital project costs, up to \$300,000.

The current maximum grant contribution of 50 per cent of eligible project costs, up to \$75,000, will continue to apply for all other project categories. This will ensure regional distribution of projects across the province.

"The Association of Manitoba Municipalities (AMM) appreciates our ongoing partnership with the provincial government to review applications and make recommendations on the Building Sustainable Communities Program," said Kam Blight, AMM president. "This funding is maximized at the local level to help grow local communities and our province."

Eligible applicants for the Building Sustainable Communities Program include non-profit organizations, charitable organizations, municipalities, and northern affairs community councils.

"We are pleased to announce that we have fulfilled one of our commitments to continue to improve the Building Sustainable Communities Program to modernize and strengthen the non-profit sector and promote capacity, sustainability and resilience in communities," added the minister.

Deadline for applications is Feb. 28. For more information about the program, or to submit an application, visit www.manitobago.ca.

February 3, 2021

Municipality of Oakland Wawanesa 54 Main Street Box 28 Nesbitt, Manitoba R0K 1P0

Dear Councilors,

Extensive public consultations for the *Manitoba Kindergarten to Grade 12 Education Review* ended in Spring 2019 with a promise of public transparency and accountability of the results from the Minister of Education. Spring 2021 is almost upon us and the results of this stakeholder consultation by the Provincial Government have yet to be made public.

In November 2020, the first reading of Bill 64, The Education Modernization Act, took place in the Manitoba Legislature. Contrary to normal practice, this bill was then withheld from public scrutiny. This leads us to ask, is the content of this Act linked to the Education Review? Will recommendations from the public review process become legislation without the public having a chance to consider or debate those recommendations? If so, where is the transparency and accountability as promised by the former Minister of Education? Where is the respect for stakeholder input and participation from the Provincial Government?

The Southwest Horizon Board of Trustees has registered to speak to Bill 64, following second reading of the Bill. This second reading may take place at any time and so we wish to inform and engage your municipality. Please see attached a revised version of our 2019 submission to the Manitoba Commission on Kindergarten to Grade 12 Education which will form the basis of our presentation. We welcome the voices of community spokespersons who would also speak to the committee on behalf of the many benefits, advantages, and contributions made by Southwest Horizon School Board and Division.

It is vital that our grassroots stand up at this critical juncture. The referral of Bill 64 to committee will present one of the most significant opportunities for our communities to speak on why local public education matters now more than ever before, considering the challenges the education system has faced throughout the pandemic. A

Carolyn Cory, Superintendent – carolyncory@shmb.ca Kevin Zabowski, Secretary Treasurer – kevinzabowski@shmb.ca

Souris Office: Box 820, Souris, MB, R0K 2C0 Telephone 1-866-447-3416 Facsimile (204) 483-5535 Melita Office: Box 370, Melita, MB, R0M 1L0 Telephone 1-866-422-5114 Facsimile (204) 522-3776

restructuring of our education system on the heels of a pandemic will not provide the resources and supports our students will need as they work to overcome the educational deficits that continue to mount due to pandemic interruptions. Our school division and communities need stability to plan in an uncertain time and the fiscal resources to do the job.

We invite you to add your voice to our request for transparency and accountability regarding the *Education Review* and the *Education Modernization Act*. We ask that you share this information and our submission to the Education Commission with your rate payers. Our communities are our schools. Our future is our children. Please join us in having our local voices heard.

Sincerely,

Cheryl Rushing

Chair

Southwest Horizon School Division

Southwest Horizon School Division's
Submission to the
Manitoba Commission on Kindergarten to Grade 12 Education
May 2019
Revised January 2021

John Dewey stated, "What the best and wisest parent wants for his own child, that must the community want for all of its children. Any other ideal for our schools is narrow and unlovely; acted upon, it destroys our democracy." (Dewey, J. (1907). *The School and Social Progress*. Chicago: University of Chicago Press) Manitoba communities, whether large or small, urban, rural, or remote, will achieve success through the education of the children. Our schools are our communities and so we must pay careful attention to the success of our schools, our students and our staff.

What do we mean by success and how best do we measure it? Literacy and numeracy skill attainment is certainly one measure of success, but students are more than numbers. Successful citizens require broader metrics to measure the quality and success of our school system. Students are critical thinkers, communicators, collaborators, creators, innovators, activists, researchers... the builders of our communities. Doesn't every parent and indeed every community stakeholder, want their child to reach his or her full potential, to become a lifelong learner who is resilient, persistent and independent? Do we not need our children to think outside the box so that they can solve future problems of which we have no current knowledge?

What are the conditions required to achieve these skills, this mindset, excellence in student achievement, and quality of life? We believe that we can create the following conditions through local support and close ties to communities because in these challenging times, the old adage 'it takes a village to raise a child' is more important than ever before.

1. Student Learning

Size Does Matter

In Southwest Horizon School Division, we strive to provide all our children with multiple opportunities to achieve success, but we also work to provide opportunities for them to learn about themselves and the world from within their own community, with the support of their community, no matter the size. Our students need equitable opportunities as close to home as possible because a student from a school of 70 students may just well be the next Einstein, the next Chris Hadfield, the next Prime Minister. The positive relationships and opportunities for leadership built in rural community schools is instrumental in student success.

Wrap Around Services

Public schools are the hub of the community in rural Manitoba and classrooms are the equalizer so true wrap around services are vital. Our rural communities need equitable access to health services including Speech Language, Occupational Therapy, Physiotherapy, mental health, counselling, family supports through CFS, RCMP, etc.

Quick access to necessary supports is often road blocked by staff turnover, red tape and lack of funding because each of these supports work in silos. Southwest Horizon and neighboring school divisions have improved efficiency of services to our pre-school children through our partnership with our local RHA called *Promise Years*.² We need to extend this model to address

¹ Zhao, Y. (Ed.). (2016). *Counting what counts: Reframing education outcomes.* Bloomington, In.: Solution Tree Press.

² www.shmb.ca

the needs of all students, pre-school to post-secondary. Pooling of funds, sharing of clinicians, open and swift communication...the model developed by local school divisions and the RHA works so why aren't we using it across the spectrum?

Additionally, in order to address systemic gaps, SHSD has used local taxpayer dollars to hire our own mental health worker and social worker, above and beyond what is offered through the RHA, so that we can ensure our students and families have their needs met in a timely manner.

Relevance

"Why do I need to learn this?" If you haven't asked yourself this question you most certainly have heard someone else, ask it during your years at school. Today more than ever before, student engagement depends on linking school experience to the 'real world'. Students have unlimited access to the world through the internet and in many cases are learning well beyond the adults in their lives. Our current Manitoba curriculum does not clearly reflect a global classroom. Manitoba students need a 'living' curriculum, a skills-based curriculum, curriculum that is not built in silos but is interdisciplinary.

We need clarity of student expectations in our provincial curriculum. If students can see the target they have a far greater chance of reaching it. If they can identify where they are at it is possible to identify the next step. Our current curriculum does not necessarily make the pathways or purpose of learning clear for students or staff. Consistency of language and cross references within the curriculum documents will assist in clarity of targets.

Manitoba would not have to look very far to find effective and clear curricular targets. British Columbia scores near the top in international assessments so why not consider their work? The current *Numeracy Achievement Project* led by the *Manitoba Rural Learning Consortium*³ and modeled off provincial work in Prince Edward Island is an example of clear targets and pathways, evidenced by marked improvement in numeracy achievement for rural Manitoba students in Grades 6 and 9 since 2018.

The Apprenticeship program and Career Development courses offer on the job, relevant learning experiences. Internships in all career pathways are necessary, not just the trades. All students in Manitoba should have the opportunity to participate in a self-directed approach to teaching and learning such as the M.E.T. school experience.⁴ The disclaimer to all of this real world experience is not that we are trying to prepare our students for particular occupations but that we open up the world of possibilities and ensure they have the skillset and mindset to follow their passion and the opportunities ahead. These programs also link students to their community and vice versa, building confidence and connection across generations.

Early Intervention

Student readiness is a crucial factor in student success. The development of emotional, cognitive and behavioural skills takes place early in life (0-5 years). International, national, provincial, and division-based research demonstrates the link between early readiness to learn and long-term student success. Southwest Horizon School Division believes in a proactive approach to building this equity from the beginning for all of our students. Because we believe in early intervention, SHSD with the support of our stakeholders, offers full-time Kindergarten during the second term of every year. This is a local choice based on evidence-based research and local voice. Our division also works with early childhood centers to provide quality resources and cross training.

Early Childhood Education should be a provincial priority if we intend to create lifelong success for our children. At the very least, Kindergarten should be mandatory. Kindergarten children should have the option of attending Kindergarten on a full-time basis and early childhood programs and curriculum should be directly linked to school aged programs. Although we work together to transition students from early childhood to school aged programs, gaps in training, programming, and funding remain.

Teaching

"Teachers.... are in the game to maximize and accelerate human potential." (Frey, Hattie, Fisher. (2018). *Developing Assessment Capable Visible Learners*. Thousand Oaks, California: Corwin, p. 149) Isn't this the purpose of education? If we accept this as our purpose, then it stands that it is necessary to maximize and accelerate the potential of staff in the education system as well. Frey, Hattie and Fisher go on to explain that learning is accelerated under 3 conditions; skill, the will to learn, and the thrill of learning. (p. 10) If learning is to happen for our students, we must create these same conditions for our staff. Just as we provide differentiated instruction for our students, so must we for our staff. In order to do that, we need to work collaboratively. SHSD staff are closely connected to our communities, passionately invested in local initiatives. As Minister Cullen noted at a meeting with SHSD Board of Trustees and Senior Administration in January 2019, "We have great people with a passion for education."

SHSD believes classroom teachers are the key players in accelerating student success and therefore need supports, resources and tools. We strongly support professional development for our staff with a focus on the key areas of our strategic plan. Listening to local voices, we have provided those supports through human resources such as literacy and numeracy coaches, a mental health facilitator, a social worker, increased counselling time, and more. We look within and outside our division system and make decisions regarding professional leadership from a balance of local need and evidence based research.

⁵ MASS (2015) Early Childhood Education and Care: A Position Paper.

Learning as The Focus

Global research and local stakeholder feedback agree that the classroom teacher is key to student success. How can we support the classroom teacher? Teachers are expected to be experts and to improve at many things including a wide variety of curriculum, research methods, best practice, child developmental theory, understanding the effects of socio-economic factors, etc. But we cannot expect them to be the expert at everything without support or to improve in multiple areas simultaneously.

We must provide teachers with easily accessible evidence-based research and high-quality resources. Each Manitoba School Division endeavors to provide this for staff but this is an area where the Manitoba Education System would benefit from leadership at the Provincial level. We need clear leadership from the Department of Education in providing high quality curriculum and clear leadership in providing quality professional learning. Currently, the *Manitoba Rural Learning Consortium* provides the high-quality professional learning model that best supports teachers' needs. The Consortium consults with school divisions who determine professional learning needs based on student data and professional input, and then the MRLC responds and plans accordingly.

Teacher professional learning must be directly linked to the needs of the current students and not necessarily to the teacher's individual area of interest. We must find a balance between teacher autonomy and responsive intervention. Decisions must be student centered and responsive if they are to make a difference. Collaboration followed by differentiation across levels is key, as has been demonstrated during the pandemic.

Teachers need relevance (Is this learning relevant to my students in their context?), ease (How close is this to my work?), and feedback (How quickly will I know if it is making a difference for my students?). ⁶ A system requires clarity of targets and best evidence-based practice to reach those targets. We need time for professionals to work together to improve practice through high quality learning opportunities.

Collective Efficacy

John Hattie's work has solidified collective efficacy as one of the most influential strategies for student success. ⁷ Collective efficacy is the belief by a group of teachers that what they do impacts student learning. It's the belief that together they can make a difference and results in the constant search for improving that ability.

Collective efficacy is built on relationships. It requires time for teachers to study, to think and talk about their students' strengths and needs, to research, to inquire...in short, to be professionals. Teaching is no longer an individual activity but a team effort because student needs reflect society and currently are extremely complex. The necessary strategies or solutions are not achievable by a lone teacher.

In the midst of the numerous negative influences outside the control of the public school are the expectations for high achievement for all students! Teaching is a complex profession and

⁶ Simon Breakspear: <u>www.LearningSprints.com</u>

⁷ Hattie, J. (2012) Visible Learning for Teachers: Maximizing Impact on Learning. New York, NY: Routledge Inc.

a social craft. Our Provincial Government must recognize that reduction of funding will result in staff reductions which will reduce collective efficacy which will have a negative impact on student achievement. Reduction of funding is counter intuitive to increasing student achievement, especially in the midst of a global pandemic. Over the past 10 months, divisions have worked collaboratively with Manitoba Education, making sound local decisions while being accountable to the Province as well as local stakeholders. Where would our Provincial Education System be if we did not have the local ties of school boards, staff, and schools?

Mentorship/Critical Friend Network

Our system would also benefit from a mentorship program for the development of instructional leadership, a structure in which leaders have access to a critical friend with no evaluative agenda. ⁸ A critical friend is an educational professional who is committed to providing support to a school. A critical friend is someone who is encouraging and supportive, but is also able to provide constructive feedback, forming the basis for collaborative work. Critical friends may advocate for the school, help to problem-solve, model effective processes, identify relevant resources, help to set goals, provide feedback, and help to interpret data.

2. Accountability

Students are more than scores on standardized assessments and our system is far more than what is measured by these assessments. Learners in Southwest Horizon School Division are unique as learners are in every region of our province and it is our duty to balance their learning to be relevant to both local and global needs. Local voice and local relationships are vital in achieving this balance. We in SHSD, couldn't realistically determine the needs for students in Churchill or Winnipeg without understanding their context, so how can a move away from local voices be anything but detrimental to our children and our communities?

What difference in student learning might we find if we could broaden collective efficacy of teachers as a province? In order to achieve this province wide efficacy, we need to develop an irrigation system for staff learning based on small wins and no blame. Provincial achievement scores will not improve by simply pointing fingers and wishing it so. Achievement scores will improve with clarity of targets and curricular pictures of best practice followed by time to practice, availability of evidence-based research and reciprocal relationships at all levels. Continued teamwork between Department of Education staff and division staff will increase alignment of goals and strategies. Again, divisions and Manitoba Education have demonstrated the value of teamwork on a weekly and sometimes daily basis during the pandemic.

International, national and provincial data is useful at the systemic level, but teachers know that continuous improvement is informed in the classroom through daily formative

⁸ https://sites.google.com/a/manitobarurallearning.org/mrlc/what-we-are-learning/what-we-are-learning-from-action-learning

assessment and feedback. This is where responsive teaching takes place and student growth occurs. Small wins add up to improved big picture data.

Finally, it is vital that Provincial Leadership recognize and address the factors (approximately 50% of all factors) that influence student achievement in schools is beyond the influence of the school. Wrap around services are improving but there is much work to be done in this area. Poverty, transiency, mental health needs, health needs, justice...government agencies must work together to provide our students with the safety net they deserve while avoiding duplication of services.

3. Governance

Southwest Horizon School Division stakeholders believe that education is a shared responsibility between home, school and community. Evidence of this belief is abundant; regular stakeholder feedback in person and via technology, Parent Advisory Councils, Student Advisory Committees, Trustee representation on local recreation district boards, communication with local municipal councils and MLAs, schools used as a hub for community events.... all of this work is based on the relationships developed over time between home, school and the community. We believe that decisions made within context of the community, by the community, best serve the needs of the community. Regardless of the size of future school divisions, it is vital that local voices are represented.

The Department of Education has a role, but it too will only work if it is based on a strong relationship with the people on the ground, within the context of each classroom, and not solely from the context of an office on Broadway or Portage Avenue.

4. Funding

The ability for school divisions to tax locally has resulted in increased opportunities, engagement and success for students in Southwest Horizon. Local tax dollars along with a 3-5 year financial commitment from the Provincial Government is vital to the future of our students. We know our students and our communities and are best placed to be fiscally responsible in providing their education. Our local staff are the ones who are on the ground and actually see and experience student needs, challenges, and successes and therefore are best suited to make funding decisions. Funding for schools in this province is critical regardless of whether or not we become the most improved province! If we don't provide a quality and equitable education for our children, Manitoba has no future.

5. Long Term Vision

In Southwest Horizon School Division, we believe it is our moral imperative to create learning conditions that result in precise, pragmatic improvement for all students. We want our students to learn from and with our provincial and global neighbors. We recognize that this will take commitment to action, community context, continuous improvement cycles and continuous

⁹ Simon Breakspear. Learning Sprints Summit for Manitoba School Leaders, 2018.

reflection. We believe that this will require increased, regular collaboration across all levels of leaders in education.

We are extremely proud of our division's progress over the past decade and especially so during the challenges of the pandemic. We have been able to keep our students in our classrooms with our dedicated staff. They are safe, they are healthy, and they want to be in our schools!

Manitoba will only have a bright future if we thoughtfully and collaboratively support all of our children! This should be a layered approach including the Province, the local school board, local administration, local classrooms, local communities, and families. The pandemic has created many roadblocks and problems to solve, but our current education system has risen to each and every challenge. Our system works for our students and our communities. Our schools are our communities and our future!

Appendix

Southwest Horizon School Division Foundational Belief Statement

SHSD believes in high levels of success for all students.

All students are capable of learning when provided with the best opportunities, tools and resources that match their strengths and needs, enabling them to be critical, dynamic thinkers.

It is the role of the school to respond to individual needs with dignity and respect, so that every student and staff member strives for success every day.

SHSD believes that learning is our core purpose.

We will promote a cycle of continuous improvement for students and staff, based on the identification of strengths and the use of relevant data and research.

Our schools are places where students and staff are passionately engaged in dynamic, flexible and relevant learning.

With the guidance, tools, and strategies provided by our schools, learners become responsible for their own learning.

Education and learning are for everyone but not the same for everyone.

SHSD believes in strong connections.

Public education is a shared responsibility between school, home, and community; every voice will inform our decisions.

SHSD will partner with community stakeholders to enhance learning beyond the walls of our schools and beyond ages 5-18.

Positive relationships are fundamental to success.

COMMITTEE REPORT FOR	Ward 3	(name of committee)
COUNCIL MEETING DATE	February 16, 2021	·
SUBMITTED BY	Councillor Shaun Cory	~

I would like to report the following:

I attended public hearings for proposed internet projects in Wawanesa on January 26 and Carroll on January 28

I attended the utility contractor meeting in Nesbitt on February 4.

Received a call from a resident concerned about speed limits near their house and safety of children entering and exiting school busses.

Councillor Cory - Ward 3

COMMITTEE REPORT FOR WARD 3

COUNCIL MEETING DATE <u>Tuesday, February 16, 2021</u>

SUBMITTED BY Councillor Sowiak

I would like to report the following:

Reviewed various financial reports, budget documents, statements, emails from FCM and grader reports.

Attended Personnel and Policy Committee meeting.

Attended monthly Municipal Council Meeting.

Attended Budget Meeting.

Attended Public Hearing – Wawanesa United Church – By-law No. 02-2021 local improvement by-law for fiber optics in Wawanesa.

Attended council meeting with SRRC.

Attended Public Hearing – Carroll Hall – By-law No. 01-2021 local improvement by-law for fiber optics in the rural area of Oakland-Wawanesa municipality.

Attended Special Council Meeting.

Time spent reviewing monthly meeting minutes for the previous and current month.

COUNCIL MEETING DATE: February 16, 2021

SUBMITTED BY: BRETT MCGREGOR

I would like to report the following:

- Responded to emails and text messages and phone calls from ratepayers on municipal questions.
- Reviewed material for regular council meeting and attended meeting.
- Reviewed Rec Commission meeting material and attended meeting. Rink remains closed, ice plant has been turned off.
- Reviewed bank reconciliations.
- Participated in multiple meetings and discussions regarding staffing of water and sewer in Wawanesa.
 Options being examined would reduce risk by creating backup with regards to staff.
- Participated in January budget meeting.
- Reviewed feedback and attended Public Hearing on fibre install in Wawanesa.
- Reviewed feedback and reached out to numerous rural residents to discuss fibre install outside Wawanesa in preparation for Public Hearing.
- Reviewed Public Works update emails weekly.

COMMITTEE REPORT FOR HEAD OF COUNCIL

COUNCIL MEETING DATEFebruary 16, 2021	
SUBMITTED BY Dave Kreklewich	
I would like to report the following:	

- Attended the Municipal office on various occasions to review matters with the CAO as well as reviewing invoices and signing cheques.
- Received and reviewed emails from ratepayers and Councillors.
- I Chaired the Public Hearing in Wawanesa on January 26 on the fiber-optic special levy bylaw.
- I Chaired the Public Hearing in Carroll on January 28 on the rural fiber-optic special levy bylaw.
- Attended a committee meeting on the Wawanesa utility operations.

CHIEF ADMINISTRATIVE OFFICER'S REPORT - February 2021

Covid-19 Provincial Calls

These weekly calls continue. Feedback on new Public Health Orders was solicited through Engage.mb.ca.

Property Matters

Two development plan amendments have been approved by the Minister. This will allow for the subsequent rezoning and subdivisions to proceed.

Animal By-law

Solicitor has reviewed the draft by-law and will submit some recommended edits in the next few weeks.

Meetings with Members of Council

Discussions continue with members of Council either in person, over the phone, or by email.

Local Improvement Plans

Prepared for and attended two public hearings for local improvement plans related to fibre optic installation in the Wawanesa and the rural area. Prepared and sent two statutory declaration packages to the Provincial Finance Officer for submission to The Municipal Board.

Meetings and Training

The office signed up for three webinars as follows:

February 11 - On-line and in-person tactics: Navigating citizen engagement in real time

March 11 - Writing for citizen understanding: How to design key messages that connect

council and residents

April 8 - Navigating social media: When and how your municipality should join the

conversation online

Council Code of Conduct

Five members of Council have completed the required Code of Conduct training. Training must be completed by May 1, 2021.

Office Purge

Staff have begun the process of reviewing and purging documents at the Wawanesa Office to consolidate within one file system.

J. Swidnicki Chief Administrative Officer

FINANCE OFFICER'S REPORT - February 2021

- Semi-annual Waste Reduction & Recycling Support (WRARS) report for July to December completed and submitted.
- Courtesy letters were sent out at the beginning of February to all ratepayers with outstanding taxes. There were 26 potential tax sale properties for 2021, totalling \$44,925.00 outstanding from 2019 and prior. A few have since come in to pay their outstanding prior amount or to make arrangements to pay.
- Work on the Preliminary budget for 2021 continues.
- Year end work continues.
- The Tax Sale process continues for the five potential tax sale properties from 2020. The Notice of Public Auction was posted on all the affected properties.
- Much time was spent working on the two Borrowing By-Laws and the Schedules and answering questions from ratepayers.
- Attended Public Hearing in Wawanesa on January 26, 2021 for the Local Improvement By-Law for the installation of fibre optics in Wawanesa.
- Attended Public Hearing in Carroll on January 28, 2021 for the Local Improvement By-Law for the installation of fibre optics in the rural area.
- Participated in a training Webinar on January 29, 2021 entitled, "Refresh and Revive your Budget Process.
- Completed the Urban/Hometown Green Team grant application for funding to hire a youth for the 2021 summer season.
- Participated in my first Canadian Association of Government Financial Officers (CAGFO) PSA Teams meeting on February 9, 2021. The group has quarterly meetings and will be reviewing two standards including five Exposure Drafts this year.

Elaine McGregor Finance Officer

Public Works Report Oakland-Wawanesa Council Meeting Feb 16, 2021 Submitted by Darcy Ketsman

Public Works Ongoing

- Gravel crushing has stopped at approximately 12,000yds due to frost conditions. Remainder of crushing will resume later this spring/summer.
- Wawanesa water treatment plant UV System install slated to start for week of March 1
- Green sand filter media slated for replacement Feb 18
- Compiling numbers for 2021 budget
- Graders were dispatched for some minor snow removal due to drifting conditions
- Submissions for 2020 gravel levies and gravel pit registrations for 2021
- Removed and cleaned up old files from Wawanesa office and transported them to the shredder
- Developing maps and criteria to start logging assets
- Developing new operations and maintenance manual for the Wawanesa water treatment plant
- Working with MB highways on the possibility on expanding on their current paving project slated for Wawanesa
- Fabricated a bulletin board for the Nesbitt mailboxes

Municipal Water Wells

No issues to report

Transfer Stations

Repaired floor and door at the Oakland WTS shack

Nesbitt Municipal Office/Maintenance Shed

Cistern has a leak and losing water, filling it up once a week

Equipment

No issues to report

Wawanesa Public Works Report

FEB 11, 2021

- 40000 gallon daily average
- water plant has no issues
- filter plant is working well
- we have a water leak again since this cold weather has set in causing the higher daily consumption
- I am out listening and looking for this leak
- we have a few places around town running taps at night trying to keep their water lines from freezing up
- · sewage lift station has no issues

MINISTER OF MUNICIPAL RELATIONS

Room 317 Legislative Building Winnipeg, Manitoba CANADA R3C 0V8

February 8, 2021

Head of Council, Dave Kreklewich Oakland-Wawanesa Municipality cao@oakland-wawanesa.ca

Dear Mr. Kreklewich:

Oakland-Wawanesa Development Plan Amendment By-law 06-2020

I am pleased to advise the above noted By-law has been approved pursuant to clause 51(1)(a) of *The Planning Act*.

I am returning one copy of this By-law to your office for your records. This By-law will come into effect upon third reading by council, in accordance with Section 52 of *The Planning Act*. Please send a certified copy of By-law 06-2020 following third reading to the Brandon Community Planning Office, at brandoncrp@gov.mb.ca.

I commend council's continued planning efforts, and wish you success in future planning and development initiatives.

Sincerely,

Honourable Derek Johnson

Minister

_		

BETWEEN:

THE MUNICIPALITY OF SOURIS-GLENWOOD, OF THE FIRST PART

And

THE MUNICIPALITY OF OAKLAND-WAWANESA, OF THE SECOND PART

FIREFIGHTING AGREEMENT

WHEREAS the Municipality of Oakland-Wawanesa has requested the Municipality of Souris-Glenwood to provide firefighting services throughout certain portions of the Municipality of Oakland-Wawanesa:

AND WHEAREAS Section 266 of The Municipal Act C.C.S.M. 1996 c.M225, provides as follows:

"For the purpose of providing fire protection services, a municipality may enter into an agreement with a person, another municipality or an agency or department of the Government of Manitoba or the Government of Canada."

AND WHEREAS the Municipality of Souris-Glenwood deems it appropriate to provide the requested firefighting services:

AND WHEREAS the Municipality of Souris-Glenwood and the Municipality of Oakland-Wawanesa are desirous of entering into an agreement whereby the Municipality of Souris-Glenwood may furnish firefighting services at the request of the Municipality of Oakland-Wawanesa:

NOW THEREFORE, the parties hereto each agree with the other as follows:

- 1. The preamble hereto forms an integral part of this Agreement.
- That for the purposes of this agreement, terms "firefighting services" or firefighting references shall be deemed to include any and all emergency calls that a Fire Brigade would normally respond to and shall not be limited to fighting fires.
- 3. The Municipality of Souris-Glenwood agrees to provide firefighting services to those portions of the Municipality of Oakland-Wawanesa set out on the attached Appendix "A" when requested to do so and the Municipality of Oakland-Wawanesa agrees to pay for same as hereinafter set forth.
- 4. The Municipality of Oakland-Wawanesa agrees to pay a non-refundable annual base fee of \$200.00 per square mile for the provision of firefighting services by the Municipality of Souris-Glenwood payable annually for the term of the agreement, upon receipt of invoice from the Municipality of Souris-Glenwood.
- 5. For the purposes of this Agreement, the applicable population base of the Municipality of Oakland-Wawanesa shall be 17 square miles for that area covered by this agreement.
- 6. The Municipality of Oakland-Wawanesa shall, in addition to paying the base fee set out in Paragraph 4 above, be charged for actual calls made by the Fire Department to the Municipality of Oakland-Wawanesa at the following rates:
 - a. Initial Response Rate (Includes Pumper, Rescue Unit, and 6 Firefighters):
 i. First hour rate see schedule of fees
 ii. Successive hours or part thereof see schedule of fees
 - b. Response Rate for Water Truck per hour see schedule of fees
 - c. The time calculations for the purposes of subparagraph (a) above shall commence from the time when fire service vehicles leave Fire Hall;
 - d. In addition to the rates set out above, a fee per kilometer traveled from Fire Hall shall be charged for each fire service vehicle responding to and from the fire site;
 - e. The charges as set out above shall be charged for each fire service vehicle responding:

- 7. It is understood and agreed between the parties hereto that if, because of conditions or circumstances, the Municipality of Souris-Glenwood requires additional equipment to assist the Fire Department in reaching or returning from the scene of a reported fire or requires additional equipment to transport water to the scene of a reported fire, that the Municipality of Souris-Glenwood will invoice the Municipality of Oakland-Wawanesa for this additional equipment in addition to the regular cost of fire services.
- 8. The decision as to the level of response made by the Municipality of Souris-Glenwood shall solely be the determination of the Municipality of Souris-Glenwood's Fire Chief, or designate.
- 9. Request or call out of fire equipment may be instigated by any responsible person residing in the Municipality of Oakland-Wawanesa or any person in trouble on any of the network of highways within the Municipality of Oakland-Wawanesa or on any inter-municipal highway between the Municipality of Oakland-Wawanesa and the various municipalities adjacent to the said Municipality of Oakland-Wawanesa.
- 10. The Fire Department of Souris-Glenwood shall notify the Fire Chief of the Municipality of Oakland-Wawanesa of any call-out of the Fire Department. The Municipality of Oakland-Wawanesa shall supply a list of names and telephone numbers of Oakland-Wawanesa Fire Department.
- 11. It is understood and agreed between the parties that in the event that the fire equipment is required at any time by any person as hereinbefore stated, then the Municipality of Oakland-Wawanesa covenants and agrees to pay to the Municipality of Souris-Glenwood the cost as set forth as and when the account is rendered, with all fees up to the limit of the base fee in each year being paid from the said base fee which shall have been paid in advance by the Municipality of Oakland-Wawanesa, and with all fees in excess of the said base fee in each year being billed to the Municipality of Oakland-Wawanesa for payment.
- 12. While it is understood and agreed that the firefighting equipment of the Municipality of Souris-Glenwood is primarily provided for the protection of property within the Municipality of Souris-Glenwood and that if the equipment at the time of receiving the Municipality of Oakland-Wawanesa's call is attending a fire in the Municipality of Souris-Glenwood, said equipment shall not be available for outside calls until the fire being attended in the Municipality of Souris-Glenwood is extinguished, it is also understood that the Municipality of Souris-Glenwood shall make every effort to attend to any emergencies in the Municipality of Oakland-Wawanesa.
- 13. The parties hereto agree that the Municipality of Oakland-Wawanesa shall not be liable in any manner whatsoever for any damages caused to the fire equipment of the Municipality of Souris-Glenwood, or any injuries sustained by any member of the firefighting services of the Municipality of Souris-Glenwood while attending a fire call within the boundaries of the Municipality of Oakland-Wawanesa, and the Municipality of Souris-Glenwood shall indemnify and save harmless the Municipality of Oakland-Wawanesa from any claim which may be made against the Municipality of Oakland-Wawanesa for damage or injury due to the negligence of the Municipality of Souris-Glenwood or their employees.
- 14. This Agreement shall be effective from the first day of January, 2021 and shall be renewable every three years on January 1st. Should the Municipality of Oakland-Wawanesa or the Municipality of Souris-Glenwood wish to make any changes to this Agreement, they shall notify the other party at least 90 days prior to the expiry of this or any subsequent Agreement.
- 15. This Agreement shall ensure to the benefit of and be binding upon the parties hereto, their respective heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF the parties hereto have caused their respective corporate seals to be hereunto affixed duly attested to by the signatures of their proper officers in that behalf the day and year first above written.

February 2, 2021

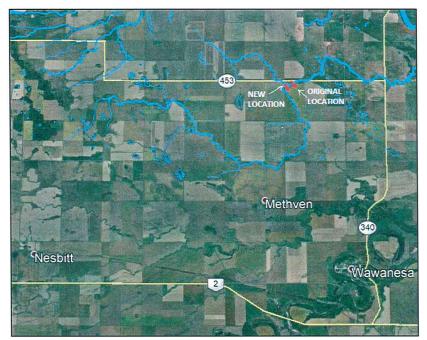

Rural Municipality of Oakland-Wawanesa Box 28 Nesbitt, MB R0K 1P0

Re: Resolution to approve Elder Dam NE-16-8-17W

Dear Council,

In the fall of 2019 Central Assiniboine Watershed District (CAWD) staff met with RM Public Works Foreman Darcy Ketsman to discuss ideas on how to reduce flooding issues on the Five Mile Creek.

CAWD Staff had previously assessed constructing an earthen dam below a fork in the Five Mile Creek on the NE-16-8-17W owned by Elder Cattle Co. Ltd. to reduce flooding in 2014. Due to lack of funding and proximity to PR 453 (making it very difficult to get licensing approval) the project was cancelled. We agreed to reinvestigate this site as a potential area to reduce downstream flows but move the structure further upstream and away from PR 453.

Ph. (204) 535-2139 Toll Free: 1-877-535-2139 Fax. (204) 535-2215

205 Elizabeth Avenue East P.O. Box 160 Baldur, MB ROK 080

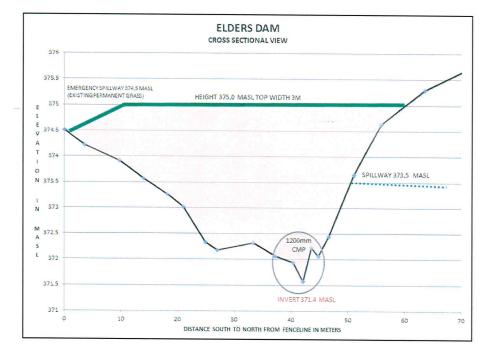

The site was surveyed in December of 2019 and determined a 3.0 meter high structure with overflow spillway set at 2.0 meter could be constructed without affecting upstream adjacent cropland. In January 2020 the Province changed water works licensing requirements for small dams with any structure over 1.5 meters in height needing to be designed and stamped by a Licensed Professional Engineer. Due to CAWD staffs prior experience in dam design and construction we could continue to design structures but would still require written approval of design by a Licensed Professional Engineer. Senior Conservation Districts Support Engineer Ken Rakhra P. Eng. agreed to review our designs. Ken Rakhra toured the site and provided drainage delineation and hydrologic flows. Soil pits were excavated to determine suitable clay and a final design was submitted for review.

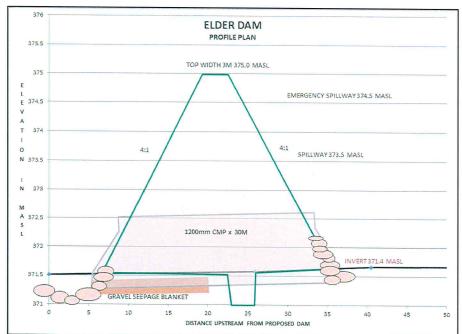

The final design is a 3.5 meter high structure with 1200mm uncontrolled open culvert. The 1200mm culvert will allow regular daily flows up to 1 in 2 year events (50% Flood Frequency). Any Flood Frequency above 50% will back flood until 2.0 meter height when it reaches the overflow spillway. At that elevation the structure is holding 13 acre feet of water. Since the 1200mm culvert has no gate, once the flooding event declines, the 13 acre feet will draw down completely and provide continuous flood protection throughout the year. This will reduce downstream flooding and infrastructure damage during heavy rain events common in the area.

205 Elizabeth Avenue East P.O. Box 160 Baldur, MB ROK 0B0

205 Elizabeth Avenue East P.O. Box 160 Baldur, MB ROK 080

Ken Rakhra P. Eng. has approved the final design. The design has been submitted to Manitoba Infrastructure's engineering department for review and approval as an affected downstream landowner.

We ask council to review and approve this project for us to proceed with the licensing permits. If the licensing permit is approved by the Province and funding is allocated we plan construction for this year.

If you require any further information please let me know,

Manitoba Water Services Board Capital Project Request Form Instructions

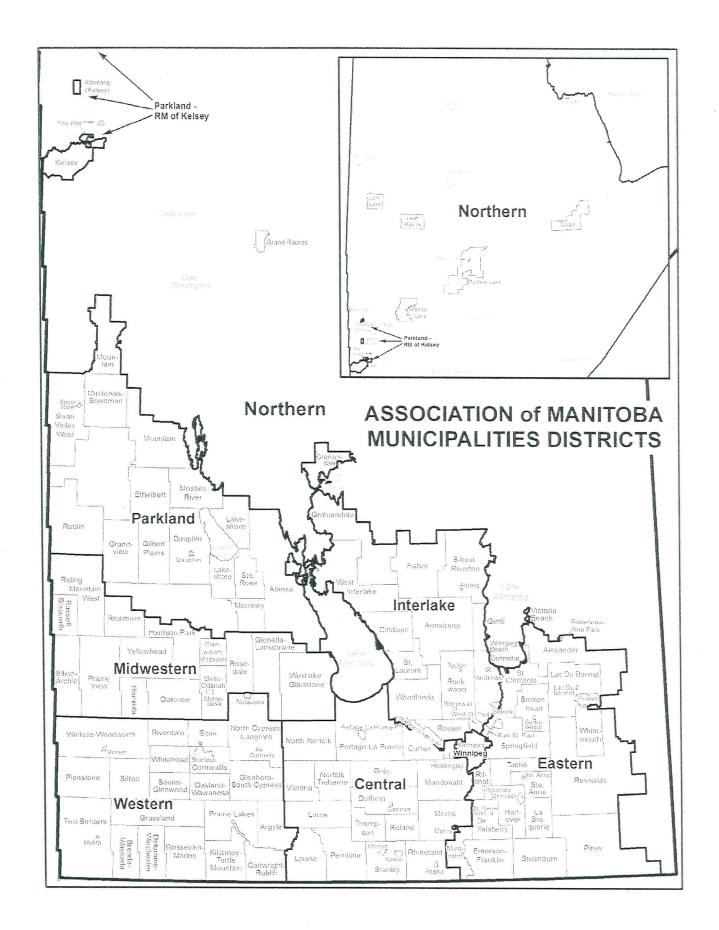

Every year the Manitoba Water Services Board (MWSB) requests Municipal Corporations and Water Cooperatives to identify their desired capital projects for consideration to be included in the MWSB Five-Year Capital Plan. Additional information on the MWSB cost-share program is available on the government website at: https://www.gov.mb.ca/mr/mwsb/index.html.

Feasibility studies may be requested at any time outside of this application by submitting a resolution of Council or the Co-op Board, and do not need to be included in this Capital Project Request Form.

This form requests Municipal or Co-operative entities within Manitoba to identify projects which are to be completed in the next 2–4 years which could be delivered as part of the MWSB Capital projects. Each individual project requires its own form to be completed and submitted.

Please submit all applications by pressing the "Submit" button in the top right-hand corner of the Project Request Form. Applications are returned by using the submit button to, Cheryl Lewis, Administrative Officer at MWSB. If you have any questions please contact Travis Parsons, General Manager (travis.parsons2@gov.mb.ca) or Cheryl Lewis (cheryl.lewis@gov.mb.ca.) All applications should be submitted by February 28, 2021.

The Association of Manitoba Municipalities (AMM) Districts Map is included below.

Project Request Form

Identify the top capital projects in order of project priority which you would like to be included for consideration in the MWSB 5-year capital plan for 2022–2027. Each project requires the following form to be completed in entirety utilizing this Adobe document. Please press submit once completed.

Note: Projects which are NOT ELIGIBLE for assitance from the MWSB are:

• Infrastructure to service cottage/resort developments.

1) Applicant Information:

Drought Proofing

 New residential subdivisions, regardless of whether they are being developed by a private developer or the municipality.

Universal Broadband Fund

From: Innovation, Science and Economic Development Canada

1 The deadline for Universal Broadband Fund (UBF) applications has been extended to March 15, 2021.

The \$1.75 billion Universal Broadband Fund will support high-speed Internet projects across the country. The Universal Broadband Fund has been designed to fund broadband infrastructure projects that will bring high-speed Internet at 50/10 Megabits per second (Mbps) to rural and remote communities. In addition to funding a diversity of high-speed Internet projects to connect Canadians, there is:

- up to \$50 million available to support mobile Internet projects that primarily benefit Indigenous peoples, including projects along highways and roads where mobile connectivity is lacking;
- up to \$750 million available for large impact projects;
- up to \$150 million available as part of our Rapid Response Stream.

The Universal Broadband Fund is part of the Government of Canada's coordinated plan to connect all Canadians: <u>High Speed Access for all:</u> <u>Canada's Connectivity Strategy</u>.

It is also consistent with the <u>Government's roadmap</u> for supporting strong and resilient rural communities.

Why is it important?

Today, high-speed Internet access is essential for all Canadians, no matter where they live. It is necessary to telework, to access on-line medicine, for distance learning and more. It helps businesses thrive, no matter where they are located, and it ensures that rural Canadians can transition smoothly to the digital economy. But there is a connectivity gap — Canadians living in rural and remote areas have less access to high-speed Internet than those living in urban areas.

That is why the Government of Canada has launched the Universal Broadband Fund, which is designed to meet the needs of those living in rural and remote communities.

Applications to the Universal Broadband Fund are currently being accepted

Get started: For applicants

Rapid Response Stream

The Universal Broadband Fund includes a <u>Rapid Response Stream</u> to which \$150 million is dedicated for projects that can be started and completed quickly.

These projects will provide immediate connectivity improvements and will be completed by November 15, 2021.

Applications to the Rapid Response Stream of the Universal Broadband Fund are no longer accepted

Additional information and resources for Universal Broadband Fund applicants and potential applicants can be found on our <u>Universal</u> <u>Broadband Fund applicant page</u>.

National Broadband Internet Service Availability Map

Our <u>National Broadband Internet Service Availability Map</u> provides comprehensive and precise mapping data detailing retail broadband Internet services and wholesale backbone infrastructure in Canada. You can use it to find what projects are happening in your area, what speeds are available and which Internet service providers are in your area.

Our map also includes new, more granular mapping data so that you can find Internet coverage at the level of 250m road segments. Zoom in close to your area and click the Rural Roads coverage on the Layer Selector bar on the left to see this detailed coverage in your area.

It is also the basis of our new <u>Eligibility Mapping Tool</u>, which will help applicants design their projects using the most accurate coverage information available. <u>Log in</u> to use the Tool.

Other federal broadband programs

The Government of Canada has several programs supporting high-speed Internet access for all Canadians, especially in rural and remote communities. A list is available via the <u>High Speed Internet for All of Canada</u> page. If you can't find what you are looking for, we would be pleased to help you. <u>Contact us</u> for more information.

Frequently Asked Questions

Expand all

Collapse all

▼ Q1. What is the Universal Broadband Fund?

The \$1.75 billion Universal Broadband Fund will provide funding to support a diversity of high-speed Internet projects across the country. It has been designed to fund broadband infrastructure projects that will bring high-speed Internet at 50/10 Megabits per second (Mbps), with a focus on rural and remote communities. The funding is available to support connecting Canadians via several streams: there is \$750 million available to fund large, high-impact projects; up to \$50 million is available for mobile projects that primarily benefit Indigenous peoples; and, up to \$150 million through our Rapid Response Stream for projects that can be completed in 2021.

- ▼ Q2. When we talk about high-speed Internet, what do we mean?

 The Government's goal is for all Canadians to have access to high-speed Internet of at least 50 Megabits per second download and 10 megabits per second upload speeds.
- ▼ Q3. How has COVID-19 affected plans for rural broadband delivery? What is the Rapid Response Stream?

COVID-19 has highlighted how much we all rely on digital connections now and in the future. It has reinforced the importance of access to high-speed Internet as, now more than ever, Canadians are working, learning and communicating with friends and family from home.

With the increased investment in the Universal Broadband Fund, we will be able to connect at least 90% of Canadians by 2021 and 98% of Canadians by 2026. This is faster than anticipated in *High Speed Access*

for All — Canada's Connectivity Strategy, which estimated only 95% of Canadians would have access by 2026.

To help achieve this, we are including a Rapid Response Stream for the Universal Broadband Fund, for which \$150 million is dedicated for projects that can get started now to connect rural Canadians as soon as possible. Further information can be found on the <u>Rapid Response</u> Stream website.

▼ Q4. Which areas are currently underserved?

There remain significant rural and remote areas of Canada that do not have access to high-speed Internet. According to the latest CRTC Communications Monitoring Report, only 41% of rural households and 31% of First Nations households on reserves have access to 50/10 Mbps service, compared to 98% access in urban households.

Programs like the Universal Broadband Fund are part of the government's strategy to close this gap, along with additional funding from the CRTC, Infrastructure Canada, the Canada Infrastructure Bank, and Indigenous Services Canada. Low Earth Orbit (LEO) satellite technology will also play an important role in connecting all Canadians.

▼ Q5. Who can apply and what projects are eligible?

The Universal Broadband Fund allows almost any Canadian entity to submit an application; however, individuals and federal entities are excluded from applying to the program. Eligible applicants must have the ability to design, build and run broadband infrastructure and must identify who will build, own and operate the broadband network.

We encourage individuals to reach out to their municipalities and their local Internet service providers to let them know about the Universal Broadband Fund and encourage them to apply for funding.

Any 250m road segment identified on the <u>National Broadband</u>
<u>Internet Availability Map</u> that does not show as having 50/10 Mbps coverage is eligible.

▼ Q6. How will projects be selected?

Projects will be selected using a three-stage assessment process that will ensure that applications from a wide variety of applicants across Canada can be considered. Ultimately, the projects that best meet the objectives of the program will be selected.

Stage one will involve meeting basic eligibility requirements. Stage two will evaluate essential criteria such as managerial capacity, technical feasibility and sustainability, and stage three involves comparing projects in the same geographic area against each other, focusing on relative technical and financial merits, as well as community benefits, such as commitment to local employment.

▼ Q7. Are mobile projects eligible?

Under the Universal Broadband Fund, up to \$50 million has been set aside to fund mobile projects that primarily benefit Indigenous peoples. These mobile projects are expected to extend 4G LTE coverage or better mobile services to unserved areas. Projects must target Indigenous communities, roads within or leading to Indigenous communities, or highways and roads where the deployment of mobile network coverage would benefit Indigenous peoples. Unserved sections of roads that would be deemed strategic for the socioeconomic development or public safety of Indigenous peoples could also be eligible.

This will complement a number of Government initiatives, which have previously been in place to support mobile projects, such as Connect to Innovate; the CRTC's \$750 million Broadband Fund; Investing in Canada Infrastructure program's Rural and Northern Infrastructure Stream (mobile projects that can be completed by September 30, 2021 are currently eligible); and programs administered by provincial and territorial governments.

▼ Q8. What are large scale, high-impact projects?

Large scale, high-impact projects must be transformative in terms of results and scope. They should target a large number of households, a large geographic area that leaves no household underserved, greatly improve the speeds offered (e.g. from 5/1 to 50/10) and have a

business case that makes sense to involve a partner like the Canada Infrastructure Bank, which is available to offer low-cost loans for broadband projects.

▼ Q9. Did the Government consult on the Universal Broadband Fund to ensure it meets the needs of all Canadians?

We have been engaging partners, stakeholders and Canadians to ensure that the Universal Broadband Fund responds to the needs of rural communities.

In developing the program, we have met with Internet service providers, municipal organizations, Indigenous organizations, and provinces and territories to ensure that the Universal Broadband Fund responds to needs identified by all partners and stakeholders.

▼ Q10. Are you on track to reach your goal of connecting all Canadians to high-speed Internet, defined as speeds of at least 50 Megabits per second (Mbps) download / 10 Mbps upload, by 2030?

In <u>High-Speed Access for All: Canada's Connectivity Strategy</u>, the government committed to getting 95% of Canadians connected by 2026 and 100% by 2030. Now, the government is on track to get 98% of Canadians connected by 2026. By leveraging funding from all levels of government, Indigenous and private sector partners, the government is on track to achieving its objective of full 50/10 Mbps broadband coverage in Canada by 2030.

Program Requirements

UBF applicants must meet the following program eligibility requirements to be considered for funding. Applications that do not meet all of the requirements outlined below may not be assessed.

Eligible Applicants

An Eligible Applicant is:

- a) A corporation, either for profit or not-for-profit, that is incorporated in Canada;
- b) A Canadian provincial, territorial or municipal entity;
- c) An Indigenous entity including :
 - a profit or non-profit organization run by and for First Nations, Metis, or Inuit peoples;
 - a band council within the meaning of section 2 of the Indian Act;
 - an Indigenous government authority established by a Self-Government Agreement or a Comprehensive Land Claim Agreement;
- d) A public sector body that is established by statute or by regulation or is wholly owned by a province, municipal or regional government which provides services to communities; or
- e) A partnership, joint venture or consortium that is composed of parties identified in (a), (b), (c) and/or (d) above;

And, that:

- i. Builds, owns and operates broadband infrastructure; or
- ii. Enters into a contractual arrangement with an entity identified in (a), (b), (c), (d) or (e) above to design, build, own and operate broadband infrastructure.

Federal entities, including Crown Corporations, are not eligible recipients.

Eligible Activities

The UBF supports projects that extend or enhance household access to high-speed Internet services in areas with speeds less than 50/10 Mbps, and/or mobile projects which primarily impact Indigenous peoples. Funding for these projects is currently available until March 31, 2027.

Broadband Projects

To be eligible for contributions under the UBF, broadband project proposals must:

- Cover areas that do not already have 50/10 Mbps service, as identified on the National Broadband Internet Service Availability Map;
- Deliver minimum service speeds of 50/10 Mbps; and,
- Provide open access to Points of Presence (PoPs) that are components of the project.
